

Supplementary Materials Template

Primary language: English. Use this document when extra files, code, data, links, screenshots, or videos are submitted.

Project Title	[Full project title]
Team Name	[Team name]
Institution	[Institution / school / organization]
Team Members	[Names and roles]
Track / Category	[If applicable]
Date	[YYYY-MM-DD]

1 Package Overview

[Briefly describe what is included in the supplementary package and how it supports the project report and technical abstract.]

2 Recommended Directory Structure

```
submission_package/  
  report.pdf  
  technical_abstract.pdf  
  supplementary_materials.pdf  
  code/  
  data/  
  results/  
  figures/  
  demo/
```

3 Code and Runtime Environment

- Operating system: [Windows / Linux / macOS / container]
- Language and version: [Python / R / JavaScript / etc.]
- Dependencies: [requirements.txt, environment.yml, package.json, or Dockerfile]
- Entry point: [Main script, notebook, or command]
- Expected runtime and hardware: [CPU / GPU / memory]

4 Data Description

- Data source and license.
- File format, sample count, feature count, and key fields.
- Preprocessing and quality control.
- Access restrictions or privacy notes.

5 Results and Demonstration Materials

- Result files and how to interpret them.
- Screenshots, interface pages, or workflow captures.
- Platform URL, repository URL, demo video URL, and access credentials if applicable.
- Consistency note linking each result back to the report section.

6 Reproducibility Checklist

Check	Item	Notes
☐	README describes the package structure.	[Notes]
☐	Main commands are provided and tested.	[Notes]
☐	Input and output paths are documented.	[Notes]
☐	Main parameters are listed.	[Notes]
☐	External data, model, or software licenses are stated.	[Notes]
☐	Supplementary claims match the report and abstract.	[Notes]
